NON-RETURN VALVE, FLOAT AND ELECTRICAL REPLACEMENT

“Working with local businesses to resolve engineering problems and repair / replace defective components”

Challenges

- Confined space.
- Isolation from system.

Services Provided

- Electrical
- Mechanical

SUMMARY:

Non return valves defective, pump control floats where not operating correctly due to poor set up and electrical cables had several faults.

SOLUTIONS:

Replaced defective non-return valve, along with new floats and electrical cables.

BENEFITS:

Testing commissioning allowed a correct set up for low and high levels to be set correctly and enables an alarm in the event of a failure.

VALUE / TIME FRAME:

- £2.1K / 1 day
